SIGMA PSI 1.0

SCIENTIFIC. INNOVATIVE. GUIDED. MACHATRONIC. ACTIVITIES

CYBERNETICS

“Computers are incredibly fast, accurate, and stupid; humans are incredibly slow, inaccurate and brilliant; together they are powerful beyond imagination.”

Albert Einstein

Regardless of whether one wants to pursue a career in Computer Science or not, studying it undoubtedly enhances one’s ability to come up with creative solutions to difficult problems. This year, at SIGMA PSI 1.0, contestants will be put through a series of questions which will demand their utmost attention, problem-solving skills, creativity, and ability to work well under pressure. The best part of this category is that you don’t have to be an expert in any software to participate! All that contestants need is resolve, willingness to work for their team, and an eagerness to test their abilities (with a little background of Computer Science along with IT of course!).

This category will test contestants’ knowledge of ICT, Computer Science and the tech world in general. The questions will start off easy and gradually become more challenging. The number of points awarded for every correct answer will be based on the difficulty level of the question and will count towards the final score for each team. There will be no negative marking. A maximum of two contestants’ from each team can participate in this category.
